Safe ownership is your responsibility. Please thoroughly read and understand this manual before loading your firearm.

Keep firearms and ammunition away from children. Lock unloaded firearms and ammunition securely in separate locations.

This manual should always accompany your firearm and be transferred with it upon change of ownership. This is your responsibility and may protect you from future liability.

100 Springdale Road
Westfield, MA 01085

INSTRUCTION MANUAL

SAVAGE ARMS MODEL A22R
.22LR

IMPORTANT! DO NOT ATTEMPT TO LOAD AND SHOOT YOUR RIFLE UNTIL YOU HAVE THOROUGHLY READ THIS INSTRUCTION MANUAL AND ARE FULLY FAMILIAR WITH ITS CONTENTS

For more information, please visit our website at www.savagearms.com
Download a QR Code reader app for your Smartphone then snap this open to Savage Arms’ homepage.

WWW.SAVAGEARMS.COM
Congratulations on the purchase of your new firearm. You are now part of the Savage Arms, Inc. family of quality firearms. With reasonable care, your firearm should deliver years of reliable service and perform to our “definition of accuracy”.

**WARNING**

The Savage A22R is a unique firearm and incorporates features that you may not be familiar with. Read and understand this manual completely before loading or using your new firearm. Failure to do so may result in serious injury or death.

- Use only .22 Long Rifle ammunition in good condition—inspect for damage before use.
- Never shoot a right-handed model left handed (or a left-handed model right handed). Doing so will put your face in the path of the forcefully-ejected case, as well as any hot gases, sparks or particles that may result from firing.
- Never disassemble your A22R beyond what’s recommended in this manual; particularly the bolt assembly, the recoil assembly and the trigger group. Doing so can disable critical safety features and result in injury.
- If you hear a weak or unusual sound or if the bullet does not exit the barrel when firing, STOP immediately.

- If anything ‘feels’ or sounds different - **stop** - and have a qualified gunsmith take a look.
- Never fire with the dust cover off or installed incorrectly. Components inside are under pressure and could come off and cause injury during firing.
- Always wear eye and ear protection when shooting. Although rare, ricochets, case failures and gas escapement can occur and cause serious eye and ear injury without proper protection.

If you do not understand any part of this manual or have questions about your firearm, contact Savage Arms in the United States at +1 413 568-7001 between the hours of 9:00 AM and 4:00 PM Eastern Time. This manual should always accompany your firearm and be transferred with it upon change of ownership. If lost or misplaced, contact your firearms dealer or Savage Arms.

For optimal performance, keep your A22R bolt lightly lubricated at all times.

**SECTION 1: SAFETY FIRST – IT’S YOUR RESPONSIBILITY**

- Loading ........................................... p. 6
- Firing ............................................. p. 7
- Adjusting fixed sights (when so equipped) ........................................... p. 7
- Unloading ........................................... p. 8

**SECTION 2: TWO POSITION SAFETY**

**SECTION 3: AMMUNITION**

- Ammunition should be secured in a safe place, away from children and bystanders. Make it a habit to clean the bore immediately before you shoot it. If the noise or smoke you hear is abnormal, STOP immediately. Put the safety on, unload the magazine to be certain they do not contain any ammunition. Engaging a firearm is a serious responsibility. A safe direction means a direction in which you have a safe backstop, move the SAFETY fully to the left exposing the backstop is clear.

**SECTION 8: STATEMENT OF LIMITED WARRANTY**

Although considerable time and effort was put into assuring the accuracy of the information contained herein, human errors do occur. If an error is found, please let us know. As a customer driven company, we appreciate and encourage feedback.
SECTION 1 - SAFETY FIRST - IT’S YOUR RESPONSIBILITY

Above all – remember that a firearm is a mechanical device. It cannot think, it cannot act on its own – it only does what you make it do. A mechanical device has no way to know if your actions are safe or if they will result in injury or death – that’s your part! It only takes one careless second to result in a tragedy that you will have to live with the rest of your life. Make no doubt about it, owning and/or using a firearm puts you in full control of its actions and their consequences!

Safety Alert Symbol And Signal Words

Safety alert symbol ⚠
Indicates safety information in this manual that must be read and understood to prevent injury or death.

Signal Words:
⚠️ DANGER ⚠
Indicates a hazardous situation which, if not avoided, will result in death or serious injury.

⚠️ WARNING ⚠
Indicates a hazardous situation which, if not avoided, could result in death or serious injury.

⚠️ CAUTION ⚠
Indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

⚠️ NOTICE ⚠
Indicates a situation that could result in damage to the firearm or other property.

10 COMMANDMENTS OF SHOOTING SAFETY

The following excerpts are from SAAMI bulletin #081. The entire booklet can be obtained by contacting the NATIONAL SHOOTING SPORTS FOUNDATION.

FIRESAMS SAFETY DEPENDS ON YOU!

From the time you pick up a firearm, you become part of a system over which you have complete control. You are the only part of the system that can make a gun safe – or unsafe.

You can help meet this responsibility by enrolling in hunter safety or shooter safety courses, if you have not already done so. You must constantly stress safety when handling firearms, especially to children and non-shooters. Develop safe shooting habits and remember, firearms safety is up to you. Make no mistake about it.

ALCOHOL, DRUGS AND GUNS DON’T MIX

⚠️ 1. ALWAYS KEEP THE MUZZLE POINTED IN A SAFE DIRECTION

This is the most basic safety rule. If everyone handled a firearm so carefully that the muzzle never pointed at something they didn’t intend to shoot, there would be virtually no firearm accidents. It’s as simple as that, and it’s up to you.

Never point your gun at anything you do not intend to shoot. A safe direction means a direction in which a bullet cannot possibly strike anyone, taking into account possible ricochets and the fact that bullets can penetrate walls and ceilings. Even when “dry firing” with an unloaded gun, you should never point the gun at an unintended target.

This is your responsibility, and only you can control it.

⚠️ 2. FIREARMS SHOULD BE UNLOADED WHEN NOT ACTUALLY IN USE

Firearms should be loaded only when you are in the field or on the target range or shooting area, ready to shoot. When not in use, firearms and ammunition should be secured in a safe place, separate from each other. It is your responsibility to prevent children and unauthorized adults from gaining access to firearms or ammunition. A loaded gun has no place in or near a vehicle or building.

Whenever you handle a firearm or hand it to someone, always open the action immediately, and visually check the chamber, receiver and magazine to be certain they do not contain any ammunition. Never assume a gun is unloaded – check for yourself! While in the field, there will be times when common sense and the basic rules of firearms safety will require you to unload your gun for maximum safety. When in doubt, unload your gun!

⚠️ 3. DON’T RELY ON YOUR GUN’S “SAFETY”

Treat every gun as though it can fire at any time, regardless of pressure on the TRIGGER. The “safety” on any gun is a mechanical device, which, like any such device, can become inoperable at
the worst possible time. The safety serves as a supplement to proper gun handling but cannot possibly serve as a substitute for common sense.

Never touch the trigger on a firearm until you actually intend to shoot.

Your firearm is a precision instrument. Regardless of the position of the safety, any bump strong enough to actuate the firing mechanism of a gun can cause it to fire. The only time you can be absolutely certain that a gun cannot fire is when the action is open and it is completely empty. You and the safe gun handling procedures you have learned are your gun’s primary safety.

4. BE SURE OF YOUR TARGET AND WHAT’S BEYOND IT
No one can call a bullet back. Don’t shoot unless you know exactly what your bullet is going to strike. Be sure that your bullet will not injure anyone or anything beyond your target. You should keep in mind how far a bullet will travel if it misses your intended target or ricochets in another direction.

Be aware that even a .22 short bullet can travel over 1¼ miles and a high velocity cartridge, such as a 30-06, can project a bullet more than 3 miles. Shotgun pellets can travel 500 yards, and shotgun slugs have a range of over a half-mile.

5. USE CORRECT AMMUNITION
You must assume the serious responsibility of using only the correct ammunition for your firearm. Read and heed all warnings, including those that appear in the gun’s INSTRUCTION MANUAL and on the ammunition boxes. Using improper or incorrect ammunition can destroy a gun and cause serious personal injury. It only takes one cartridge of improper caliber or gauge to wreck your gun, and only a second to check each one as you load it. Be absolutely certain that the ammunition you are using matches the specifications that are contained within the gun’s instruction manual and the manufacturer’s markings on the firearm barrel.

Hand loaded or reloaded ammunition deviating from pressures generated by factory loads or from competent recommendations specified in reputable hand loading manuals can be dangerous, and can cause severe damage to guns and serious injury to the shooter.

Ammunition that has become very wet or has been submerged in water should be discarded in a safe manner. Do not spray oil or solvents on ammunition or place ammunition in excessively lubricated firearms.

Form the habit of examining every cartridge you put in your gun. Never use damaged, old or questionable ammunition – the money you save is not worth the risk of possible injury or a ruined gun.

Discharging firearms in poorly ventilated areas, cleaning firearms or handling ammunition may result in exposure to lead and other substances known to cause birth defects, reproductive harm and other serious physical injury. Have adequate ventilation at all times. Wash hands thoroughly after exposure.

6. IF YOUR GUN FAILS TO FIRE WHEN THE TRIGGER IS PULLED, HANDLE WITH CARE!
Occasionally, a loaded gun may not fire when the trigger is pulled. If this occurs, keep the muzzle pointed in a safe direction. Keep your face away from the breech. Then, carefully open the action, unload the firearm and dispose of the cartridge in a safe way.

Any time there is a cartridge in the chamber, your gun is loaded and ready to fire - even if you've tried to shoot and it did not go off. It could go off at any time, so you must always remember RULE #1 and WATCH THAT MUZZLE!

7. ALWAYS WEAR EYE AND EAR PROTECTION WHEN SHOOTING
All shooters should wear protective shooting glasses and some form of hearing protectors while shooting. Exposure to shooting noise can damage hearing, and adequate vision protection is essential. Wearing eye protection when disassembling and cleaning any gun will also help prevent the possibility of springs, spring tensioned parts, solvents or other agents from contacting your eyes. No target shooter, plinker or hunter should ever be without them.

8. BE SURE THE BARREL IS CLEAR OF OBSTRUCTIONS BEFORE SHOOTING
Before you load your firearm, open the action and be certain that there is no cartridge in the chamber. Then glance through the barrel to be sure it is clear of any obstruction. Even a small bit of mud, snow, excess lubricating oil or grease in
the bore can cause dangerously increased pressure, causing the barrel to bulge or even burst when firing, which can cause injury to the shooter and bystanders. Make it a habit to clean the bore with a cleaning rod and patch to wipe away anti-rust compounds in the gun each time immediately before you shoot it. If the noise or recoil on firing seems weak or doesn’t seem quite “right”, cease firing immediately and be sure to check that no obstruction or projectile has become lodged in the barrel.

9. DON’T ALTER OR MODIFY YOUR GUN, AND HAVE GUNS SERVICED REGULARLY
Firearms are complicated mechanisms, which are designed by experts to function properly in their original condition. Any alteration or change made to a firearm after manufacture can make the gun dangerous and will usually void any factory warranties. Do not jeopardize your safety or the safety of others by altering the trigger, safety or other mechanism of any firearm or allowing unqualified persons to repair or modify a gun.

Your gun is a mechanical device, which will not last forever and is subject to wear. As such, it requires periodic inspection, adjustment and service.

10. LEARN THE MECHANISM AND HANDLING CHARACTERISTICS OF THE FIREARM YOU ARE USING
Not all firearms are the same. Consequently, never handle any firearm without first having thoroughly familiarized yourself with the particular type of firearm you are using, the safe gun handling rules for loading, unloading, carrying and handling that firearm, and the rules of safe gun handling in general. Locate the firearm’s mechanical safety device and get familiar with the feel and “on/off” positions.

You should always read and refer to the INSTRUCTION MANUAL you received with your gun, or if you have misplaced the manual, simply contact the manufacturer for a free copy.

Having a gun in your possession is a full-time job. You cannot guess; you cannot forget. You must know how to use, handle, and store your firearm safely. Do not use any firearm without having a complete understanding of its particular characteristics and safe use. There is no such thing as a foolproof gun.
SECTION 3 – AMMUNITION

WARNING
Using improper or damaged ammunition can cause serious injury or gun damage.

- Always inspect your ammunition before using it. Never use damaged, corroded/stained, old or questionable ammunition. The money you save is not worth the risk of possible injury or a damaged gun.
- If you hear a weak or unusual sound or if the bullet does not exit the barrel when firing, STOP immediately. Put the safety on, unload the firearm, disassemble (as detailed in SECTION 5) and check the barrel from the breech (not the muzzle) for any obstructions.
- Use only ammunition specifically designated as “22 Long Rifle (22 L.R.)”. This firearm is not compatible with any other 22 caliber ammunition.
- Use only new ammunition manufactured to SAAMI specification. Any other ammunition can cause gun damage or personal injury, and will void the warranty.
- Routinely inspect the case head, rim and body of fired brass for any signs of unusual bulging or rupturing. If you find anything out of the ordinary, discontinue use immediately and call Savage Arms in the United States at +1 413-568-7001 (9:00 AM to 4:00 PM Eastern Time) or a qualified gunsmith.

For best performance, thoroughly clean and lightly lubricate the inside of the receiver, barrel, and chamber before loading with ammunition. Performance may vary based on brand/type of ammunition, individual characteristics of the firearm, and/or shooting conditions. Bullet specifications and trajectories are available directly from the ammunition manufacturer.
SECTION 4 – BASIC USE

LOADING

WARNING
Accidental discharge can cause serious injury or death. Never load your A22R or bring a loaded A22R into a car, house or structure. Always keep the safety on and your finger off the trigger until you have clearly identified your target, lined up your sights on the intended target and verified that the backstop is clear.

WARNING
A barrel obstruction can cause excessive pressure upon firing and result in gun damage or personal injury to you or a bystander. Before loading and with the safety on, always inspect the barrel visually and with a cleaning rod for any sign of snow, mud, sticks, brush, leaves, debris, cleaning brushes, bullets or other obstructions. Never fire with the muzzle underwater or otherwise obstructed.

1. Ensure the SAFETY BUTTON is fully to the right to the FULL SAFE position (see FIGURE 1).
2. With one hand ready to catch the MAGAZINE, use the other hand to support the firearm and depress the latch at the front of the MAGAZINE, ejecting the MAGAZINE into your hand (see FIGURE 3).
3. With the muzzle pointed in a safe direction and your finger off the TRIGGER, slowly pull the BOLT HANDLE fully rearward. A “clicking noise” will be heard and the bolt will lock at the fully rearward position (see FIGURE 4).
4. Look to be sure there is no cartridge in the chamber.

WARNING
Ensure the caliber stamp on the MAGAZINE (see FIGURE 5) and barrel are both .22 L.R. The ammunition you are using must also match exactly. Shooting incorrect ammunition can cause serious personal injury and gun damage.

5. Load the correct cartridge type (.22 Long Rifle – see AMMUNITION section above) into the MAGAZINE by pressing downward on the cartridge rim and sliding under the MAGAZINE lips (see FIGURE 5).

FIGURE 5

FIGURE 3

FIGURE 4
WARNING
Do not load a cartridge through the ejection port. Doing so increases the chance of an unintended discharge or out of battery firing due to a slam or pinch fire, which can result in personal injury or death. Always use the magazine for loading a cartridge into the chamber.

FIRING

WARNING
Always wear eye and ear protection when shooting. Although rare, ricochets, case failures and gas escapement can occur and cause serious eye or ear injury without proper protection.

WARNING
Do not shoot with a missing, broken or altered component (e.g., DUST COVER, ACTION SCREWS, EXTRACTOR). Doing so can affect the safe and proper function of your firearm, and result in personal injury and gun damage.

WARNING
Always keep the safety on and your finger off the trigger until you have clearly identified your target, lined up your sights on the intended target and verified that the backstop is clear.

WARNING
Never shoot a right-handed model left handed (or a left-handed model right handed). Doing so will put your face in the path of the forcefully-ejected case, as well as any hot gases, sparks or particles that may result from firing.

WARNING
Never assume a MAGAZINE is empty, even if you hear a ‘click’ when the TRIGGER is pressed.

WARNING
If a cartridge fails to fire after pressing the trigger, point the muzzle in a safe direction, put the SAFETY into the FULL SAFE position and wait 30 seconds. Follow the UNLOADING instructions to remove the cartridge.

WARNING
If a cartridge fails to fire after pressing the trigger, point the muzzle in a safe direction, put the SAFETY into the FULL SAFE position and wait 30 seconds. Follow the UNLOADING instructions to remove the cartridge.

ADJUSTING FIXED SIGHTS (WHEN SO EQUIPPED)
Certain models will have fixed sights: rear sight on the receiver and front sight on the barrel (muzzle end).

1. There are two adjustments on the REAR SIGHT: windage and elevation (see FIGURE 6).

   1. To move the point of impact to the right, loosen the WINDAGE ADJUSTMENT SCREW (1/16 inch Allen wrench) and move...
the REAR SIGHT BLADE to the right. Move it in small increments and then retighten the ADJUSTMENT SCREW.

3. To move the point of impact up, loosen the ELEVATION ADJUSTMENT SCREW (1/16 inch Allen wrench) and move the REAR SIGHT BLADE up. Move it in small increments and then retighten the ADJUSTMENT SCREW.

To remove the REAR SIGHT, loosen the two MOUNTING SCREWS using a 3/32 inch Allen wrench.

UNLOADING

1. With the muzzle pointed in a safe direction, your finger off the TRIGGER and the SAFETY on, depress the latch at the front of the MAGAZINE and remove it from the firearm.

2. Pull back on the BOLT HANDLE to lock the BOLT fully rearward.

3. Look in the chamber to ensure it is empty. Do not assume!

4. Carefully look down into the cartridge opening of the MAGAZINE to be sure it is empty. A colored stripe will be visible indicating that it is cartridge slot #1.

SECTION 5 – MAINTENANCE

WARNING
Ensure the gun is unloaded and the safety is on before disassembling or cleaning in any way. Never attempt to disassemble, clean, or oil a loaded firearm. Look and feel! Be sure the chamber and magazine are completely empty – do not assume!

WARNING
Do not disassemble beyond what is recommended below. Doing so can damage or disable critical safety features or interfere with the safe operation of your firearm and cause personal injury and gun damage.

WARNING
Bolt assemblies and other parts are specifically matched to your firearm. Interchanging parts from other firearms can cause serious injury or gun damage. To avoid mixing components, disassemble only one firearm at a time.

TIMEFRAME
Rimfire cartridges can leave unburnt powder, soot, bullet lube, and other contaminates (to name a few) in the receiver, chamber, and barrel, causing unreliable function. In addition, like any mechanical device your gun will not last forever and is subject to wear. When something does not sound, feel, or look right, seek the advice of a professional gunsmith immediately. Never take a chance. As with any precision tuned mechanical device, periodic inspection/maintenance is required – and your responsibility.

It is difficult to establish a time period or number of rounds as the basis for when a firearm should be examined, cleaned, and thoroughly inspected. Different shooting conditions, weather patterns, and types of ammunition, to list a few, all play a significant role in answering the questions ‘when’ and ‘how often’. As a general rule, ‘more often’ is much safer than ‘not enough’. We recommend performing these basic procedures WITH AN UNLOADED FIREARM before every shooting session and cleaning after every use.

- Locking the BOLT HANDLE open, shine a light into the ejection port and look down the barrel to be sure it is clear of any obstructions. There should be no signs of damage (nicks, scratches, etc.), rust, or pitting.

- Function the BOLT HANDLE and REPEATER HANDLE making sure the BOLT cycles without binding.

- Check the outer surface of the barrel, running your fingers gently down the length, feeling for any bulges or signs of damage.

- While the action is open, inspect the inside of the receiver and bolt face for signs of damage, excessive wear, excessive firing residue, or missing components.

- Carefully examine the STOCK and studs that secure the carrying strap.

- Be sure the DUST COVER is in place and the RECOIL ASSEMBLY properly seated in its place.
• Check the scope rings and bases for tightness.
• Be sure that action screws are tight prior to each shooting session.

WHO SHOULD DO THE CHECKING: As the owner – or user – it is your primary responsibility to assure the firearm is safe prior to using it. Although we know its condition when it leaves the factory, we have no control or insight as to what has or has not been done once it leaves our hands.

After reading and understanding this INSTRUCTION MANUAL – and prior to loading with live ammunition - you should be very familiar and capable of handling the items noted above. In depth mechanical issues or questions as well as periodic examinations should be referred to a qualified gunsmith, your Firearms Dealer or Savage Arms Service Department.

Mechanical devices will by the nature of their design, wear and as such may require very specific adjustments. Placed in the wrong hands and improperly done, you may be responsible for an injury or even death of the shooter or bystander.

DISASSEMBLY

⚠️ CAUTION ⚠️
Parts are under tension. Keep your fingers and eyes away from springs and moving parts and always wear eye protection during disassembly and cleaning.

**NOTICE**
Be sure the SAFETY stays in the FULL SAFE position to prevent the hammer from snapping forward during the disassembly/assembly process.

1. After confirming the firearm is unloaded (as detailed in SECTION 4) and the safety is on, CLOSE THE BOLT by pressing the REPEATER HANDLE.

⚠️ CAUTION ⚠️
Attempting to disassemble with the bolt open will put extreme pressure on the recoil assembly, which could cause injury.

2. Insert a small punch through the opening of the DUST COVER, gently pushing the RECOIL ASSEMBLY forward and upward (see FIGURE 7).

3. Carefully lift the DUST COVER from the receiver (see FIGURE 8).

4. Carefully remove the RECOIL ASSEMBLY (see FIGURE 9).

⚠️ WARNING ⚠️
Parts will be under tension. Release spring slowly and keep away from your eyes.

FIGURE 7
With the RECOIL ASSEMBLY removed, the BOLT HANDLE is no longer retained, allowing it and the BOLT assembly to fall out if the action is tilted.

FIGURE 9
WARNING
Damage to or alteration of the RECOIL ASSEMBLY can affect the safe operation of your firearm, and result in injury and gun damage. Do not attempt to disassemble the RECOIL ASSEMBLY. Inspect the RECOIL ASSEMBLY for damage. If the RECOIL SPRING, RETENTION CLIP or GUIDE ROD appear damaged, bent or unsecured, DO NOT USE. Contact a gunsmith, your Firearms Dealer or Savage Arms immediately.

5. Remove the rear STOCK ASSEMBLY SCREW (also known as ACTION SCREW) using a 5/32 inch Allen wrench (see FIGURE 10).

6. Remove the front STOCK ASSEMBLY SCREW (also known as ACTION SCREW) using a 5/32 inch Allen wrench (see FIGURE 11).

7. Centrally position the SAFETY so that it does not interfere with removing the STOCK.

8. Remove the STOCK. The TRIGGER HOUSING RETAINING PIN will fall out if the action is tilted sideways.

9. Slide the TRIGGER HOUSING RETAINING PIN from the receiver (see FIGURE 12).

10. Remove the TRIGGER HOUSING ASSEMBLY by sliding it forward then tipping the rear downward (see FIGURE 13).

11. Remove the BOLT HANDLE and then BOLT ASSEMBLY by sliding it back through the receiver and upward (see FIGURE 14).
**WARNING**

Damage to or alteration of the TRIGGER ASSEMBLY can affect the safe operation of your firearm, and result in injury and gun damage. Do not attempt to disassemble the TRIGGER ASSEMBLY. Inspect the TRIGGER ASSEMBLY for damage. If any part appears damaged or unsecured, DO NOT USE. Contact a gunsmith, your Firearms Dealer or Savage Arms immediately.

**WARNING**

Damage to or alteration of the BOLT ASSEMBLY can affect the safe operation of your firearm, and result in injury and gun damage. Do not attempt to disassemble the BOLT ASSEMBLY.

**WARNING**

Do not disassemble your A22R beyond this point. Disassembling anything (such as but not limited to: bolt assembly, trigger assembly, recoil assembly, etc.) other than what you have been instructed to do may cause damage to the firearm and/or injury to the shooter or bystander.

**CLEANING**

**WARNING**

Failure to properly maintain your firearm may lead to damage and/or serious injury to the shooter or bystander.

1. Prepare an area for cleaning the firearm with a suitable surface, adequate ventilation, correct caliber cleaning rod, brush, patches, powder solvent, and lubricant. Be sure to read and understand all of the cautions and warnings on all solvents and chemicals prior to use. Follow the manufacturer’s instructions for best cleaning results.

2. Disassemble as described in the applicable section above.

3. Lay the firearm horizontally.

4. Using a small amount of powder solvent on the brush, push the cleaning rod through the barrel several times. Always start from the chamber end and push the cleaning rod from the bore out the muzzle end.

5. Unscrew the brush from the cleaning rod and replace it with a patch tip.

6. Push a new patch through the bore starting from the chamber end and out the muzzle.

7. Repeat the prior step (# 6) several times until the patch comes out clean.

8. Push a new patch saturated with gun lubricant through the bore.

9. Push a new dry patch through the bore to remove the excess lubricant.

10. Shine a light into the ejection port and look down the barrel to ensure it is clear from any obstructions or damage.

**WARNING**

If the barrel or chamber show signs of nicks, scratches, rust, pitting or other damage, DO NOT USE. Damage can result in high pressure and cause personal injury.

11. Carefully wipe all BOLT components, removing any contaminants and apply a VERY LIGHT coat of gun lubricant. A very thin film is sufficient protection – do not over lubricate!!

12. Clean and lightly lubricate all interior metal surfaces.

13. Reassemble per the applicable section below.

14. When done, always verify that the two position SAFETY is operational as explained in SECTION 2.

**WARNING**

Check the bore carefully by looking through the breech end (not the muzzle) to be sure there are no obstructions (i.e., pieces of cleaning patch, a cleaning brush, cleaning rod). A barrel obstruction can cause excessive pressure upon firing and result in gun damage or personal injury to you or a bystander.

**REASSEMBLY**

1. Insert the BOLT ASSEMBLY into the back of the RECEIVER, being sure to orient it properly (see FIGURE 15).
2. Prior to installing the TRIGGER HOUSING ASSEMBLY, verify that the MAGAZINE EJECTOR SPRING is positioned properly (see FIGURE 16) and the SAFETY is still in the FULL SAFE position.

**CAUTION**
Watch your fingers – parts are under tension! Moving the SAFETY off of FULL SAFE may allow the hammer to snap forward.

3. Insert the TRIGGER HOUSING ASSEMBLY into the receiver, aligning the tabs on the receiver to the flats on the TRIGGER HOUSING (see FIGURE 17).

**CAUTION**
The EJECTOR fits snugly in the EJECTOR SLOT in the bolt (see FIGURE 17). Align the two carefully so that the EJECTOR does not get bent or distorted.

4. Once in place, slide the entire TRIGGER HOUSING ASSEMBLY rearward until rests firmly against the rear of the receiver.

5. Insert the TRIGGER HOUSING RETAINING PIN (opposite of FIGURE 12). The TRIGGER HOUSING PIN will fall out if the action is tilted sideways.

6. Orient the BOLT HANDLE so that the RECOIL ASSEMBLY HOLE is correctly aligned when the RECOIL ASSEMBLY is inserted (see FIGURE 18).

**CAUTION**
The BOLT HANDLE may fall out if the action is tilted sideways.

**WARNING**
If the BOLT HANDLE HOLE is not aligned properly (see FIGURE 18), the RECOIL PIN will not go through the hole when the RECOIL ASSEMBLY is installed in the next step. If that happens, the BOLT HANDLE may fall out or be forcefully ejected during firing.

7. Slide the BOLT rearward so as to see the hole for the RECOIL ASSEMBLY.

8. Insert the RECOIL ASSEMBLY into the back of the BOLT (see FIGURE 19).
9. Slightly compress the back of the RECOIL ASSEMBLY to secure it in the receiver (see FIGURE 20).

10. To verify that the RECOIL PIN is retaining the BOLT HANDLE (see STEP 6 above), pull gently on the BOLT HANDLE as shown in FIGURE 21 by pulling away from the firearm.

11. Centrally position the SAFETY and place the action back into the STOCK. Push firmly rearward to ensure contact in the recoil lug area and secure the front STOCK ASSEMBLY SCREW first to 50 inch pounds.

12. Install the rear STOCK ASSEMBLY SCREW to 50 inch pounds.

13. Carefully position the DUST COVER so that the front tab is inside the receiver and the sides are straddling the receiver (see FIGURE 22).

14. Slide the DUST COVER forward and down until it locks into position (see FIGURE 23). The rear of the RECOIL ASSEMBLY will be visible through the DUST COVER (it appears to be a grey dot).

**WARNING**
The recoil assembly must be positioned correctly in order to retain the DUST COVER while firing. If incorrectly positioned, the DUST COVER may come loose during firing and injure the shooter.

**WARNING**
Ensure the DUST COVER is seated properly and locked into position (sides flush with the receiver and grey ‘button’ fully engaged in the opening). An unsecured DUST COVER may come off during firing and injure the shooter.

15. Cycle the action and engage the SAFETY several times to assure that it is functioning properly prior to loading. If the action does not cycle properly or the BOLT binds, remove the DUST COVER and review the steps above.
SECTION 6 – PARTS LIST AND DIAGRAM

Please be advised that some parts may require fitting. Savage Arms bears no responsibility for the function or performance of any firearm that has been repaired or modified by other than Savage Arms Service Department or its designated repair facility. As such, Savage Arms accepts no responsibility/liability for any direct and/or consequential damage and/or injury resulting from the use of a firearm repaired or modified by other than the Savage Arms Service Department or its designated repair facility.

Some parts are under tension – watch your fingers and always wear eye protection.
Some parts are under tension – watch your fingers and always wear eye protection.

SECTION 8 – STATEMENT OF LIMITED WARRANTY

For your convenience, registration may now be completed directly from our website (WWW.SAVAGEARMS.COM) twenty-four hours a day.

WHO IS COVERED?
• The original owner (with proof of purchase).

WHAT IS COVERED?
• Any defect in materials or workmanship (performed by Savage Arms) encountered during normal use.

HOW LONG IS THE WARRANTY PERIOD?
• One (1) year from the date of purchase.

WHAT IS NOT COVERED?
PERSONAL INJURY, PROPERTY DAMAGE, AND/OR DAMAGE TO THE FIREARM CAUSED BY:
• Improper maintenance or failure to provide proper care and maintenance in accordance with this manual.
• Alterations/modifications performed without the written authorization of Savage Arms Service Department.
• Normal wear; tear; and/or corrosion.
• Accidental discharge, careless handling, and/or misuse.
• Barrel obstructions.
• Use of ammunition other than new ammunition loaded to SAAMI specification.
EXCLUSIONS AND LIMITATIONS:
ANY WARRANTIES IMPLIED BY LAW SHALL IN NO EVENT EXTEND BEYOND DURATION OF THIS EXPRESS WARRANTY. Some States do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you. REPAIR OR REPLACEMENT AS PROVIDED HEREIN IS YOUR EXCLUSIVE REMEDY FOR ANY DEFECTIVE PRODUCT. IN NO EVENT SHALL WE BE LIABLE FOR ANY SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY KIND ARISING OUT OF THE PURCHASE OR USE OF THIS PRODUCT, WHETHER BASED UPON CONTRACT, TORT, STATUTE OR OTHERWISE. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from State to State.

RETURNING A FIREARM FOR REPAIR WORK:
For WARRANTY claims, proof of purchase must accompany the firearm.

Contact your local Firearms Dealer for instructions on obtaining Savage Arms factory authorized repair work. Savage Arms Service Department may also be contacted for assistance in the United States at +1 413 568-7001 between 9:00 AM and 4:00 PM Eastern Time. Information may also be found at www.SavageArms.com.

WARNING
Firearms must be handled responsibly and securely stored to prevent access by children and other unauthorized users. California has strict laws pertaining to firearms, and you may be fined or imprisoned if you fail to comply with them. Visit the Web site of the California Attorney General at https://oag.ca.gov/firearms for information on firearm laws applicable to you and how you can comply. Prevent child access by always keeping guns locked away and unloaded when not in use. If you keep a loaded firearm where a child obtains and improperly uses it, you may be fined or sent to prison.

WARNING
This product can expose you to chemicals including lead, which is known to the State of California to cause cancer and reproductive harm. For more information go to www.P65Warnings.ca.gov

ADVERTENCIA
Las armas de fuego requieren de manejo responsable y almacenamiento seguro para evitar que niños u otros usuarios no autorizados tengan acceso a ellas. California cuenta con leyes estrictas sobre las armas de fuego, y usted puede ser multado o sentenciado a prisión si no las cumple. Visite la página web del fiscal general de California en https://oag.ca.gov/firearms para obtener más información sobre las leyes de armas de fuego que apliquen y cómo cumplirlas. Evite que los niños tengan acceso a las armas, manteniéndolas guardadas bajo llave y descargadas siempre que no estén en uso. Si mantiene un arma cargada en un lugar donde un niño tiene acceso a ella y la utiliza de forma indebida, puede ser multado y enviado a prisión.

ADVERTENCIA
Este producto puede exponerle a sustancias químicas que incluyen el plomo, que el estado de California reconoce como causante de cáncer y daños al sistema reproductivo. Para más información, visite www.P65Warnings.ca.gov

AVERTISSEMENT
Les armes à feu doivent être manipulées de manière responsable et entreposées de façon sécuritaire, hors de la portée des enfants et d’autres personnes non autorisées. Les lois californiennes relatives aux armes à feu sont strictes, et le non-respect de ces lois peut entraîner une amende ou une peine d’emprisonnement. Consultez le site Web du Procureur général de Californie au https://oag.ca.gov/firearms pour de l’information sur les lois touchant les armes à feu applicables et sur les moyens de s’y conformer. Pour empêcher les enfants d’accéder aux armes à feu, celles-ci doivent toujours être enfermées dans un lieu sûr et déchargées, lorsqu’elles ne sont pas utilisées. Toute personne qui entrepose une arme à feu chargée à un endroit où un enfant peut l’obtenir et en faire une mauvaise utilisation est passible d’une amende ou d’emprisonnement.

AVERTISSEMENT
Ce produit peut exposer l’utilisateur à des produits chimiques, comme le plomb, que l’État de Californie reconnaît comme étant cancérigène et nocif pour la reproduction. Pour plus d’information, consultez le www.P65Warnings.ca.gov
