- 11 degree target crown

RASCAL TARGET XP

OVERVIEW:

The industry's safest micro rimfire has come of age—and it's ready to shoot, right out of the box. The Rascal Target XP comes with a mounted and boresighted 4x32mm scope, as well as a bipod sling swivel stud mount. It's built for accuracy and adaptability, thanks to a precision hardwood stock, heavy 16 1/8-inch barrel, one-piece Picatinny rail and threaded (1/2-28) muzzle. Like the original Rascal, the single shot rifle cocks by lifting the bolt and unloads easily—without pulling the trigger. The design also builds superior shooting skills thanks to full-size rifle features, including Savage's user-adjustable AccuTrigger™ system. The platform offers far better safety, functionality and accuracy than competing designs.
